PROFESSIONAL SUMMARY

Computer Science Engineering graduate skilled in Python full-stack development, REST API design, and database management, with experience building web, Android, and AI-powered applications. Seeking a Software Developer role to build scalable, impactful products.

EDUCATION

G M Institute of Technology, Davangere, India 2022 – 2026

B.E. in Computer Science & Engineering | CGPA: 7.5 / 10

Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Object-Oriented Programming, Web Technologies, Software Engineering

SDM Residential PU College, Ujire, India 2021 – 2022

Class 12 (PCMB) | 68%

TECHNICAL SKILLS

Languages: Python, C++, Java, JavaScript, SQL

Frameworks & Web: React.js, Next.js, Django, Flask, FastAPI, PHP, HTML, CSS, Bootstrap, REST APIs

Databases: MySQL, PostgreSQL

Tools & Platforms: Git, GitHub, Gemini API, Figma, Tableau, Android, ESP8266

Core CS: Data Structures & Algorithms, OOP, DBMS, Computer Networks

EXPERIENCE

QSpiders, Bengaluru, India Feb 2026 – May 2026

Python Full-Stack Developer Intern

- Developed and maintained responsive web applications using Python, HTML, CSS, and JavaScript across multiple device sizes.
- Built backend services and APIs with Django and Flask, integrating MySQL databases for reliable data storage and retrieval.
- Debugged and optimized real-time application features to improve stability, and collaborated in a team using Git and GitHub.

PROJECTS

AI Career Copilot 2026 – Present

React.js, Next.js, FastAPI, Python, PostgreSQL, Gemini API

- Developing an AI-powered platform that helps users improve resumes and enhance job readiness.
- Implemented resume analysis and ATS score evaluation with AI-driven improvement suggestions.
- Built a job-matching system that compares resumes against job descriptions to identify skill gaps.
- Integrated AI APIs to generate interview questions, cover letters, and personalized career roadmaps.
- Designed a responsive UI and secure backend APIs for a seamless user experience.

In-Hospital Pharmacy Integration Feb 2025 – Jan 2026

Android, Java, XML, PHP, MySQL, REST API

- Built a mobile-based pharmacy system to automate prescription handling and medicine inventory management.
- Designed and developed RESTful APIs in PHP with MySQL for secure data storage and real-time client-server communication.
- Reduced manual errors and processing time, improving hospital workflow efficiency, with a clean Android UI built using XML and Bootstrap.

Employee Performance Dashboard Sep 2024 – Dec 2024

HTML, CSS, JavaScript, PHP, MySQL, Tableau

- Developed an interactive dashboard to monitor and evaluate key employee performance metrics.
- Engineered the frontend with HTML, CSS, and JavaScript and a PHP + MySQL backend, integrating Tableau visualizations to surface insights and enable data-driven decisions.

Anti-Bike Theft System (IoT) Feb 2023

IoT, ESP8266, Sensors, Embedded Systems, Blynk

- Designed an IoT-based anti-theft system using motion sensors to detect unauthorized vehicle access.
- Implemented real-time mobile alerts via the Blynk platform using ESP8266 wireless communication, delivering a cost-effective, scalable security solution (basis for a published research paper).

CERTIFICATIONS

- Interface — Christ University (Sep 2024)
- Figma for UX Design — LinkedIn Learning (Mar 2025)
- Hack To Future 3.0 — SJEC Mangaluru (Apr 2025)
- Workshop on DevOps — B.M.S. College of Engineering (Sep 2025)

PUBLICATIONS

[Implementation of Anti-Bike Theft Using Arduino](#). Published at NSCEEE 2025 (National Conference on Smart Systems and Emerging Electronics & Electrical Engineering).

ACHIEVEMENTS

- 3rd Place — Utkarsh 2025 Hackathon, UBDT College of Engineering
- Tech-Tatva National Science Day (2023).
